Reliable dosing

- Pneumatic dosing pumps ensure process reliability, and therefore satisfied customers, at every wash bay during peak periods.
- Protect the environment and reduce costs at the same time

Cost-effective cleaning

- Using detergent concentrate ensures lower consumption, which means that your systems can be run at a reduced cost both to you and to the environment.

Simple maintenance

- The large front doors with a removable middle bar allow easy access to the assemblies - this saves maintenance time and your system is soon ready to use again.
